

Ameer Jawabra

Full Stack Software Engineer

Mississauga, ON, Canada | +1 (672) 962-1808 | ameer0233@gmail.com | Portfolio: ameer-portfolio.netlify.app

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building and delivering scalable web, mobile, desktop, and SaaS applications. Strong in React, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, AWS, Docker, REST APIs, and CI/CD. Delivered 35+ client and product projects, improved application performance by up to 40%, reduced infrastructure costs by 45%, and built production systems supporting 100K+ database records and 10K+ users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, Kotlin

Frontend: React.js, Next.js, React Native, Redux, HTML5, CSS3, Tailwind CSS, SCSS

Backend & APIs: Node.js, Express.js, Laravel, REST APIs, GraphQL, Socket.IO, WebSockets, Firebase Functions

Databases: PostgreSQL, MySQL, MongoDB, Redis, Firestore, Firebase Realtime Database

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, CloudFront), Google Cloud, Docker, GitHub Actions, NGINX, CI/CD

Testing & Security: Jest, Mocha, Cypress, OAuth2, JWT, Firebase Auth, Helmet.js, CORS, rate limiting, k6, Artillery

Tools & Architecture: Git, GitHub, Postman, Jira, Figma, MVC, MVVM, Clean Architecture, Microservices, Monorepo

PROFESSIONAL EXPERIENCE

Full Stack Developer - Upwork | January 2023 - Present

- Delivered 25+ full-stack projects for international clients, maintaining 5-star ratings across completed contracts.
- Built production applications with React.js, TypeScript, Node.js, and Express.js, improving development velocity by 30%.
- Migrated legacy workloads to AWS Lambda and cloud services, reducing monthly hosting costs by 45%.
- Optimized PostgreSQL and MongoDB queries across datasets exceeding 100K records, improving response times by 20%.
- Implemented OAuth2, Firebase Auth, JWT authentication, Helmet.js, CORS, and API security controls.

Full Stack Developer - Mreshet (Digital Marketing Firm) | June 2021 - December 2022

- Developed a SaaS website-builder platform used by 150+ clients using React, Node.js, and PostgreSQL.
- Developed and maintained an Android application in Kotlin and scaled push-notification workflows to 10K+ users.
- Introduced Redis caching that reduced application load time by 40%.
- Created Docker-based development environments and CI/CD pipelines, reducing deployments from hours to minutes.
- Built REST API and WebSocket integrations for real-time synchronization across client websites.

Freelance Full Stack Developer | January 2020 - May 2021

- Delivered 10+ substantial projects including admin dashboards, customer portals, booking systems, and cross-platform applications.
- Refactored and debugged legacy monolithic systems, improving code maintainability by 60%.
- Built a time and task management platform with analytics used by 300+ daily active users.
- Developed a multi-restaurant order management system with a custom CMS using PHP, JavaScript, and MySQL.
- Built a Flutter and Firebase medication-management application with offline-first capabilities and a car-rental booking system with Stripe payments.

SELECTED ENGINEERING PROJECTS

- Machine Learning Game: Built a game using neuroevolution techniques; project was featured in a local technology blog.
- Teach Me: Built a cross-platform tutoring application using Flutter and Firebase as a final diploma project, with cloud deployment components.

EDUCATION

Technion - Practical Software Engineering Diploma | 2018 - 2021 | Graduated with Excellence

ITSafe Cyber College - Cybersecurity Diploma | 2021 | Linux, Python scripting, Android and web application security

ADDITIONAL

Languages: Arabic (Native), English (Professional Proficiency), Hebrew (Fluent)
