

AMEER JAWABRA

FULL STACK SOFTWARE ENGINEER

Mississauga, ON, Canada | +1 (672) 962-1808 | ameer0233@gmail.com

ameerjawabra.com | github.com/ameerjawa | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of hands-on experience building scalable web, SaaS, mobile, and cloud applications. Strong across React, Next.js, TypeScript, Node.js, PostgreSQL, MongoDB, AWS, Docker, APIs, and CI/CD. Delivered 25+ client projects and built systems supporting 150+ clients, 10K+ users, and databases with 100K+ records, with measurable improvements in performance, deployment speed, and infrastructure cost.

PROFESSIONAL EXPERIENCE

Full Stack Engineer | Upwork - Self-Employed, Remote

Jun 2023 - Present

- Delivered 25+ full-stack projects for international clients using React, Node.js, TypeScript, and Express, maintaining strong client satisfaction.
- Designed and optimized PostgreSQL and MongoDB data layers for systems handling 100K+ records, improving query response times by 20%.
- Migrated legacy workloads to AWS Lambda and cloud infrastructure, reducing monthly hosting costs by 45%.
- Implemented OAuth2, Firebase Auth, JWT authentication, Helmet.js, CORS, and secure API patterns across production applications.

Full Stack Developer | Mreshet - Contract Full-Time

Aug 2021 - Jun 2023

- Developed a SaaS website-builder platform supporting 150+ clients using React, Node.js, and PostgreSQL.
- Built Android functionality in Kotlin and scaled push-notification systems supporting 10K+ users.
- Integrated Redis caching, reducing application load time by 40%, and implemented WebSockets and REST APIs for real-time synchronization.
- Created Docker-based development environments and CI/CD pipelines, reducing deployment time from hours to minutes.

Freelance Web Developer | Freelancer.com - Freelance, Remote

Jan 2020 - Nov 2021

- Delivered 10+ web and software projects for small businesses, including dashboards, customer portals, booking systems, CMS platforms, and mobile applications.
- Built solutions with JavaScript, PHP, MySQL, Flutter, Firebase, REST APIs, and third-party integrations including Stripe.
- Refactored and debugged legacy systems to improve maintainability, reliability, and application performance.

SELECTED PROJECTS

LifeSync - Full-Stack Life Management Platform | React, TypeScript, Supabase, PostgreSQL

- Unified task, health, finance, and AI-powered insight workflows in a modern full-stack application with authentication and structured data management.

Exchanger - Real-Time Trading Platform | TypeScript, APIs, WebSockets

- Built a private cryptocurrency monitoring platform with real-time market data, authentication, secure backend services, and exchange-opportunity workflows.

Project Management Platform | React, Node.js, JavaScript, REST APIs

- Developed a full-stack sprint and project management application with authentication, user profiles, and structured client-server architecture.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, React Native, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, PHP, REST APIs, GraphQL, WebSockets / Socket.IO, Firebase Functions

Databases: PostgreSQL, MongoDB, MySQL, Redis, Firebase / Firestore, Supabase

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, CloudFront), Docker, GitHub Actions, CI/CD, NGINX, Git

Mobile: Kotlin (Android), Flutter

Testing & Engineering: Jest, Mocha, Cypress, Postman, Lighthouse, MVC, Clean Architecture, Microservices

EDUCATION

Practical Software Engineering Diploma | Technion - Israel Institute of Technology

Oct 2018 - Jun 2021

- Graduated with Excellence. Final project: cross-platform tutoring application built with Flutter and Firebase.

Cybersecurity Diploma | ITSafe Cyber College

2021

- Coursework included Linux, Python scripting, reverse engineering, and web/mobile application security.
